

## QHSE POLICY

We TD Forge are manufacturing forged materials since 1983 and supply throughout the world to our customer and our policy is to:

- Meet and / or exceed customer requirements with full compliance to internal specifications.
- Maintain highest level of quality in manufacturing through continuous improvement,
- Achieve the agreed delivery dates with committed Quality Level.
- Achieve customer satisfaction by effective implementation of the QMS, EMS and OHSMS by each of our employee
- Comply with all the applicable legal and other requirements related to Occupational Health & Safety and Environment
- Avoid hazard, reduce risk and building accident free work environment by proactive measures.

The foundation of TD Forge is, Team work and prevent risk which may affect other colleagues and the organization. The quality policy is posted on the company announcement board and in different offices to communicate within the organization. It is also posted on TD Forge Italia Spa Website to communicate to external interested parties.

## QHSE OBJECTIVES

- Organization has determined its QHSE Objectives in consistent with its QHSE policy to meet the requirements of IMS and conforming the product which will result in customer satisfaction.
- Product quality
- On time delivery
- No customer complaint
- No harm to environment and neighbours
- No accident (LTI – Loss time injury)
- 

## VISION & MISSION

- TD Forge wants to become the partner of worldwide leaders where forging and TD FORGE manufacturing capacity may be needed.
- Our first target is to grow our company position as quality-oriented forgings manufacturer to provide turnkey solutions for Forgings, Ring rolling, Fully Robotic Automatic Heat Treatment, Machining and Overlay Cladding in every size and material grades.
- More and more we understand the safety & Environment globally shows us, this is top priority from everybody, so same way TD Forge has also commitments on those two aspects. In fact, TD Forge has made research & development and built a prototype of gasification power plant that is generating Syngas and power from wooden chips with almost zero emission.
- We have the target that TD Forge groups work exactly according to defined standards without personal interpretations.
